Title: American Indian Land, Water, and Other Resources

Abstract: Control over tribal land, water, and other resources within tribal boundaries remains an ongoing struggle for American Indian tribes in the United States, giving rise to conflicts between tribal, federal, state, and municipal governments. This talk by an enrolled member of the Choctaw Nation and a former employee of the Bureau of Indian Affairs critically examines and explores two 21st-century conflicts over tribal natural resources: one that involved Choctaw timber land and another that centered on Choctaw water.
